Recognize and control

- Where is the disease?
- What is the disease?
- Do my people know what to do?
- What is the plan?

Where is the disease?

- Where on the farm?
- In what house?
- Where in the house?

What is the disease?

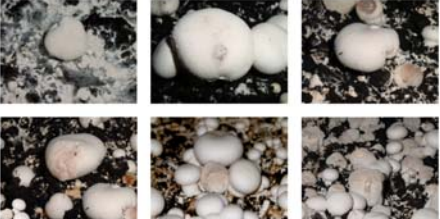

- Fungi
- Bacteria
- Virus
- Insects
- Combination

Do my people know what to do?

- Training and education
- Posters and magazines
- Motivation

Verticillium and Mycogone, recognize and control.

Do's:

- Touch disease.
- Leave disease untreated.
- Water on disease.
- Cure disease by spraying or watering.

Do's:

- Immediately alert supervisor when disease is spotted.
- Look out for new spots of disease.
- Wear clean and washed clothes every day.
- Wear clean shoes and disinfect when possible.
- Keep doors of growing houses closed.
- Follow the right sequence and go from young houses to older houses.
- Clean picking tools like frames, buckets and knives every day after picking.
